EXPERIENCE STATEMENT

Dedicated and experienced Control & Instrumentation Engineer with proven design, maintenance, project handling, and commissioning experience. More than 13 years of experience in the Oil & Gas field, specializing in Automatic Control Systems and Field Instrumentation. Great knowledge about international standards, FAT/SAT procedures, HAZOP and SIL participation, and vendor coordination. Energy Management System (EnMS) Lead Auditor ISO 50001:2018 Certified

---

WORK HISTORY

Employer Name: SOPC

From: 4/2024
To: Present
Location: Suez, Egypt
Position Held & Duties: Lead I&C Engineer

- Led instrumentation and control activities for ongoing projects, including the New Coker Complex and Reformer Plant DCS Upgrade.
- Directed and supervised maintenance operations for running production units, ensuring optimal reliability, efficient turnaround cycles, and timely availability of spare parts.
- Conducted energy management system audits in accordance with ISO 50001:2018 requirements.

Project Experience in this Position:
- SOPC - New Coker Complex (2018 InProgress) - Involved from project specification to construction phase, including HAZOP, HAZID, SIL, and technical evaluations.

- SOPC - Reformer unit - DCS upgrade (2024) - Technical study, FAT, SAT, installation, commissioning, and startup.

Employer Name: SOPC

From: 5/2021
To: 3/2024
Location: Suez, Egypt
Position Held & Duties: Senior I&C Engineer

- Contributed to project planning and execution, including document reviews, FAT, installation, commissioning, and SAT activities, ensuring compliance with project targets and quality standards.

- Assisted in developing project specifications, preparing Material Requisitions, and approving vendor lists to align with technical and commercial requirements.

- Actively participated in detailed engineering reviews, including P&ID, HAZOP, SIL, 3D models, and vendor print review sessions.

- Supervised all preventive and corrective maintenance activities for control systems such as DCS, ESD, PLC, HMI, Machine Monitoring Systems, and Asset Management Systems.

- Oversaw maintenance and calibration of field instrumentation using advanced diagnostic and calibration tools (HART handheld, signal, pressure, and temperature calibrators).

- Trained, mentored, and led the maintenance team to enhance technical capability, efficiency, and adherence to safety and operational standards.

- Developed comprehensive technical specifications for the Integrated Control and Safety System (ICSS) of the Tank Farm, covering architecture design, control philosophy, safety integration, and system interfaces.

Project Experience in this Position:
- SOPC - Tank Farm - Tank Gauging System (2022) -Technical study, installation, commissioning, and startup.
- SOPC - Tank Farm - ICSS system (2022) - Specification development, Technical study
- SOPC - PSA unit - PLC & Scada upgrade (2021) - Change the whole system with new one.

Employer Name: SOPC

From: 4/2015
To: 3/2021
Location: Suez, Egypt
Position Held & Duties: I&C Engineer

- Led and executed preventive and corrective maintenance for all control systems, including DCS, ESD, PLC, HMI, Machine Monitoring Systems, and Asset Management Systems.

- Supervised and guided a team of technicians in performing maintenance for field instrumentation such as transmitters, orifices, solenoids, control valves, and analyzers.

- Utilized signal and pressure calibrators (Fluke 715, 719) and field metrology wells (Fluke 9144-A-P) to test, calibrate, and evaluate field instruments with high precision.

- Configured and diagnosed smart field devices using HART communicators (Emerson 475, 375, and others), ensuring optimal performance of transmitters and valve positioners.

- Prepared detailed technical specifications and feasibility studies for equipment, spare parts, tools, and control systems to support continuous operation and reliability.

- Actively participated in project bidding, Factory Acceptance Tests (FAT), Site Acceptance Tests (SAT), installation, commissioning, and startup activities.

Project Experience in this Position:
- SOPC - Reciprocating compressor 11K-1A (2020) – Technical study, commissioning, and FAT.
- SOPC - Reformer unit - ESD & Local Panel with HMI (2018) -Technical study, FAT, SAT, installation, commissioning, and startup.
- SOPC - Hydrogen unit - DCS & AMS upgrade (2018) -Technical study, FAT, SAT, installation, commissioning, and startup.
- SOPC - Sulphur unit - ESD upgrade (2018) -Technical study, FAT, SAT, installation, commissioning, and startup

---

Employer Name: Suez Steel Company

From: 2/2014
To: 1/2015
Location: Suez, Egypt
Position Held & Duties: Instrument Engineer

- Performed installation, calibration, and troubleshooting of field instruments for process and utilities.
- Maintained transmitters, control valves, and analyzers for furnaces and material handling systems.
- Supported commissioning and start-up activities in coordination with operations and maintenance teams.

Employer Name: Suez University

From: 1/2013
To: 1/2014
Location: Suez, Egypt
Position Held & Duties: Teaching Assistant

- Assisted in teaching electronics and control engineering courses.
- Supported laboratory sessions, supervised students' projects, and maintained instrumentation labs.
- Prepared educational materials and reports for engineering departments.

EDUCATION

Educational Attainment: Bachelor of Electronics and Communication Engineering
Name of School: El Shorouk Academy / Faculty of Engineering
Year of Graduation: 2012

GENERAL INFORMATION

Professional Affiliations:
- Egyptian Engineers Syndicate, Egypt

Certifications
- ISO 50001:2018 – Energy Management System (EnMS) Lead Auditor, 2025

Software Skills:
- CONVAL and OEM sizing software from different brands
- Triconex - Tristation
- HIMA - Hi-Quad
- Yokogawa – Centum VP and PRM
- Yokogawa – ProSafe
- Foxboro (I/A SERIES FCP270)
